CMZ is a women-owned company founded by Emma Cecilia Martínez Zuccardi, who leads the company with the support of her sons. We produce, pack and export conventional and organic lemons.

We are a family business with a young, dynamic, entrepreneurial spirit and we keep a broad vision to be in constant renovation. We carry out craft labor, from the beginning in our tree nurseries to the finished box with the best lemon to trade in the world.

We believe in the importance of looking for alternatives to sustainable agriculture to offer a healthier diet, and at the same time take care of the environment. This is why we dabbled into organic production since 2015 to offer consumers the highest quality, healthiest, and most nutritious products.
